The provisions of this section (according to 5.6.1 of the Billings County Zoning Ordinance) shall apply to any application for a land use permit or subdivision on land that meets either of the following two conditions:

- (1) Any portion of the building envelope that includes slopes in excess of fifteen (15) percent;
- (2) Land that is located on or within fifty (50) vertical feet of the elevation of any prominent ridgeline. Lands that meet either of these two provisions are herein referred to as hillside land or ridgeline land, respectively.

Prominent Ridgeline Defined

A prominent ridgeline shall be defined as any ridgeline, as viewed from any point along a designated major roadway corridor which create a silhouette with the sky. The currently designated roadway corridors are Interstate 94, including all business loops and US Highway 85, and all county roadways. Other potential major roadway corridors from which to identify prominent ridgelines, whether existing or proposed at the time a subdivision or land use permit application is submitted, may be designated by the Planning and Zoning Board during the development review process. These new major roadway corridors shall then establish view points from which to identify prominent ridgelines.
